- Penile Sheath Wearers
- Paraplegic / Quadriplegic
- Leg Bag Wearers

User Instructions

We all now have an option, no more carrying full bags of Urine to the toilet. No more Stale smell of Urine when emptying. No more washing out of Night Drainage Bags.

User Instructions

Night Time

1. Connect the open end of the tube onto the wall socket.

Morning Time

5. Let residual urine in urostomy pouch drain away into tubing.

2. Insert the white connector end of the tubing into the Urostomy pouch. (or Sheath/leg-bag etc).

6. Remove tubing connector from Urostomy Pouch and be sure to close the pouch tap or replace the plug.

3. Secure the tubing to the mattress using the bed-peg provided. (If required).

7. Lift the tube vertically, draining urine towards the wall socket.

4. You are now Ready for a peaceful nights sleep.

Remember,
Drink Some Water.

8. Fill syringe with warm water and disinfectant then insert it into the tube and flush through. Once tube has emptied, store away.

Points To Remember

Drink plenty of water; this will help cut the chance of infections.

Secure tube with bed peg, this will give you more freedom in bed.

If pouch fills during the night, manipulate the pouch so urine flows away.

Flush system with water & Disinfectant daily.

Emergency Procedure

In the very rare event of the system blocking or freezing, or any other form of system failure, please revert to the night drainage bags supplied.
